Project #	2M-PSOIL
------------------	----------

Type	Facilities
-------------	------------

Program	Facilities - Parks & Rec
----------------	--------------------------

Project Description

Add Engineered soil to fields 3, 7 and 10 to bring them to playable condition.

Existing Condition

The current fields do not have enough of the right soil to shed water in the event of rain. This project will improve play on the existing fields while the overall new design is worked on.

Project Goals

Make the current fields playable while the overall park plan takes shape. This will provide for playing opportunities for the CBSL players as well as the outside groups that utilize the fields.

Expenditures	2025
Facilities	\$100,000
