| Type | Equipment | Program | Equipment - Fire Department |

Project Description

Replacement of 32 portable radios and appurtenances. This is being funded through a FEMA grant and is a carry over from 2024.

Existing Condition

The current portable radios have surpassed the service life of the manufacturer and are no longer being supported. As the radios are no longer being supported, parts are no longer being made and service technicians are unable to make repairs.

Project Goals

The goal is to have the replacement radios in-hand before August of 2025. Communications is one of the highest priorities on an emergency response and having reliable radio equipment is paramount.

| Expenditures | 2025 |
|--------------|-----------|
| Equipment | \$272,000 |
